PHYSICIANS WANTED

GOLDEN VALLEY HEALTH CENTERS

Golden Valley Health Centers, one of the oldest, largest, and most respected Community Health Centers in the United States, has an opening for an experienced, Board-Certified Family Practice Physician. Join a team of highly regarded FP's, an Ob/Gyn, and a WNP in practicing state of the art medicine in a well appointed, modern office with excellent support staff. We strongly believe in and foster a team approach to Family Health Care.

Golden Valley Health Centers is located in the center of California's Central Valley; we are a short distance from Yosemite, San Francisco, and California's famed Coast, including all of the sporting, cultural, and recreational activities associated with these areas. We have a very low penetration of managed care and serve a diverse patient population.

We offer a pleasant working environment, call schedule of 1:4, and a very generous, comprehensive compensation package including base salary, production bonus, % of hospital revenue, malpractice, disability, life, health ins., and CME. Opportunities for teaching and/or Community Service strongly supported.

For information, contact:

Western Journal of Medicine

INSTRUCTIONS FOR AUTHORS

In accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (URM), 1997

Our readers represent all branches of medicine. We wish to receive and publish manuscripts that are reliable and lively and that will improve the care of patients, the health of the public, or policies affecting either. Manuscripts should be of interest to a broad range of scholars, busy practitioners, students, and physicians in training who have a clinical orientation. The purpose of a paper or letter may be to report, inform, alert, review, and discuss, but, above all, to teach. Titles should be short and intriguing. Avoid the overuse of jargon, adverbs, and expendable words and phrases; use only standard abbreviations and acronyms; and use inclusive language (see AMA Manual of Style, 8th Edition). We appreciate your interest in The Western Journal of Medicine and our profession.

Manuscript Information

Manuscripts should be sent to the Editor, Linda Hawes Clever, MD, c/o Publisher, The Western Journal of Medicine, 1224 West Main Street, Suite 200, Charlottesville, VA 22903-2858. Manuscripts must be original, not previously published, and not under consideration by another publisher. If preliminary data were included in another presentation or publication, this should be noted in the cover letter, and a copy of that publication should be included. Any conflict of interest, actual or potential, should be revealed to the Editors (see Letter of Transmittal). Obtaining informed consent to protect patients' rights to privacy should be documented according to URM 1997.

All manuscripts should be double-spaced and, including references and abstract but not tables, should not exceed:

- Articles: 3,000 words (15 double-spaced pages)
- Conferences and Reviews: 3,000 words
- Topics in Primary Care Medicine: 3,000 words
- Case Reports, Alerts, and Notices: 1,500 words
- Commentaries: 2,000 words
- Lessons From the Practice: 1,000 words
- Letters to the Editor: 500 words

Manuscripts, except for Case Reports, Epitomes, and Lessons From the Practice, should include a nonstructured abstract of no more than 200 words summarizing the article. Abstracts should include a description of the purpose, design, patients, results, and conclusions.

Letters to the Editor must be double-spaced and will be published at the discretion of the Editors. They may be edited for style and brevity. Those of a scientific nature may be subject to peer review. They should be no more than 500 words in length. Authors will be sent page proofs before publication.

All manuscripts will be subject to peer review in addition to review by the Editors to determine the originality, validity, and importance of content and conclusions. Reviewers' comments will be returned with rejected manuscripts at the discretion of the Editors. All reviewers will remain anonymous but will be required to state possible conflicts of interest.

All accepted manuscripts are subject to copyediting, and the corresponding author is sent edited page proofs for approval and necessary minor changes. Excessive changes at this stage may result in a delay of publication or withdrawal of the paper. No changes will be made after the final, edited version has been approved by the corresponding author without notifying the author. It is the corresponding author's responsibility to clear all corrections and changes with coauthors.

Letter of Transmittal

All authors must sign the letter of transmittal, with one author designated as correspondent and his or her name, address, and telephone and fax numbers included.

The order of authorship is determined by the authors. All authors should meet the basic criteria for authorship (as stated below). Because the order of authorship is assigned in different ways, its meaning cannot be inferred accurately unless it is stated by the authors. Authors may explain the order of authorship in a footnote.

A letter of transmittal, except for one accompanying a manuscript from US Government employees whose work was done as part of their official duties, must include a paragraph that transfers copyright: "In consideration for reviewing and editing my submission, the author(s) undersigned hereby transfers, assigns, or otherwise conveys all copyright ownership to The Western Journal of Medicine, in the event that such work is published by the journal."

The letter of transmittal must include a statement of author responsibility signed by all authors: "I have participated in the conception and design of this work and in the writing of the manuscript and take public responsibility for it. I have reviewed the final version of the manuscript and approve it for publication. I attest to the validity and legitimacy of data in the manuscript and agree to be named as the lead author or coauthor of the manuscript."

The letter of transmittal must include a description of sources of funding and the role of sponsors, including their involvement, if any, in review and approval of the manuscript for publication. The letter must also include a statement of financial disclosure: "I warrant that I have no financial interest in the drugs, devices, or procedures described in the enclosed manuscript (except as disclosed in the attached statement)."

Research or project support should be included as a footnote to the manuscript or in the accompanying cover letter.

Manuscripts concerned with experimental investigation on human subjects must include in the text a statement that all subjects gave their informed consent and that approval was obtained from the appropriate ethics committee.

Acknowledgments will be printed on a select basis—to acknowledge those who contributed to but were not involved in the writing or review of the paper. They should not include persons whose work on the manuscript was a part of their regular duties.

Preparation of Manuscripts

Everything, including references, tables, figure legends, and abstracts, must be double-spaced.

Please submit the following: The original manuscript, two copies, and a copy of the manuscript on disk (labeled with the word processing program used). Allow a margin of 2.5 to 4 cm (1 to 1.5 in) on both sides. Be sure to include the references, tables, and figure legends on the disk. Formatting should be kept to a minimum. Manuscripts transmitted by facsimile machine are not acceptable unless requested by the Editors.

All values should be in Systeme International (SI) units, with metric equivalents following in parentheses. Temperature readings should be given in Celsius. Use the generic name of drugs, with the salt or ester given at the initial mention of a drug.

Figures (illustrations) should be submitted in triplicate in black and white, unmounted 12.7 X 17.8 cm (5 X 7 in) glossy prints, with the figure number, lead author's name, and top of the photo indicated with a label on the back. Patients (and relatives) have a right to anonymity in published clinical documentation. Details that might identify patients should be avoided unless essential for scientific purposes. Masking of the eye region in photographs of patients may be inadequate protection of anonymity. If identification of patients is unavoidable, informed consent should be obtained. This should be clearly stated and proof submitted with the manuscript. Changing the data on patients should not be used as a way of securing anonymity.

Figure legends, to be typed in sequence on the same page, should be in complete sentences. Any figures or tables previously published must be accompanied by a letter of permission to borrow from the copyright holder (the previous publisher). The permission of the authors should also be obtained. The Editors discourage the use of borrowed figures or tables.

Reprints

A form for ordering reprints will be sent to the corresponding author when the article is published.

References

All references should be cited in the text using superscript numbers and listed in their order of citation. They should be pertinent to the text and not simply a listing of the results of a computerized search. They should be in URM style according to the following examples. Do not use *op cit* or *ibid*.

References should be medical, scientific, or scholarly publications. Others—such as newspapers or magazines—should be kept to a minimum.

Journal Articles

Abbreviations of journal titles should conform to those used in Index Medicus. List up to six authors; for seven or more, use *et al* after listing the first six.

1. Vega KJ, Pina I, Krevsky B. Heart transplantation is associated with an increased risk for pancreatobiliary disease. *Ann Intern Med* 1996; 124:980–983
